

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) A benzimidazole compound represented by the following formula (I) or a salt thereof:

wherein, R^1 represents one or more functional groups on the benzene ring selected from the group consisting of a hydrogen atom, a halogen atom, a lower alkyl group, and a lower alkoxy group; R^2 represents a hydrogen atom, or an alkyl group, ~~or an acyl group~~; R^3 represents one or more functional groups on the ring containing the nitrogen atom and A ; A represents CH_2 , or CH which forms a double bond with an adjacent carbon atom; L represents a C_4 - C_8 alkylene group or an ethyleneoxy linking group represented by $(CH_2CH_2O)_nCH_2CH_2$ wherein n represents 1 or 2; X represents O, S or methylene group; and m represents 0 or 1.

2. (original) The compound or a salt thereof according to Claim 1, wherein X is O or S.

3. (original) The compound or a salt thereof according to claim 1 or 2, wherein m is 0.

4. (previously presented) The compound or a salt thereof according to claim 1, wherein each of R^1 and R^2 represents a hydrogen atom.

5. (previously presented) The compound or a salt thereof according to claim 1, wherein L is a C_4 - C_8 alkylene group.

6. (previously presented) The compound or a salt thereof according to claim 1, wherein L is a C_5 or C_6 alkylene group.

7. (currently amended) A benzimidazole compound represented by the following formula (II) or a salt thereof:

wherein, R^{11} represents one or more functional groups on the benzene ring selected from the group consisting of a hydrogen atom, a halogen atom, a lower alkyl group, and a lower alkoxy group; R^{12} represents a hydrogen atom, or an alkyl group, or an acyl group; R^{13} represents one or more functional groups on the piperidine ring selected from the group consisting of a hydrogen atom, an alkyl group, a hydroxyalkyl group, a phenyl group which may be substituted, a hydroxyl group, an alkoxy group, an amino group, an acyl group, a cyano group, a carbamoyl group and an alkoxycarbonyl group; L^1 represents a C_4 - C_8 alkylene group; and X represents O, S, or methylene group.

8. (original) The compound or a salt thereof according to Claim 7, wherein L^1 is a C_4 - C_8 alkylene group.

9. (original) The compound or a salt thereof according to Claim 7 or 8, wherein R^{11} and R^{12} represent hydrogen atom.

C1
Conf
10. (previously presented) The compound or a salt thereof according to claim 7, wherein R^{13} is a functional group selected from the group consisting of a hydrogen atom, an alkyl group, a hydroxyalkyl group, a phenyl group which may be substituted, a hydroxy group, and a cyano group.

11. (previously presented) The compound or a salt thereof according to claim 7, wherein L^1 is a C_5 or C_6 alkylene group.

12. (currently amended) A pharmaceutical composition comprising a compound represented by the following formula (I)

wherein, R¹ represents one or more functional groups on the benzene ring selected from the group consisting of a hydrogen atom, a halogen atom, a lower alkyl group, and a lower alkoxy group; R² represents a hydrogen atom, or an alkyl group, ~~or an acyl group~~; R³ represents one or more functional groups on the ring containing the nitrogen atom and A; A represents CH₂, or CH which forms a double bond with an adjacent carbon atom; L represents a C₄-C₈ alkylene group or an ethyleneoxy linking group represented by (CH₂CH₂O)_nCH₂CH₂ wherein n represents 1 or 2; X represents O, S or methylene group; and m represents 0 or 1, or a physiologically acceptable salt thereof as an active ingredient, and a pharmaceutical additive.

13. (canceled)

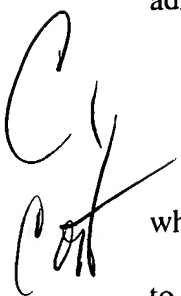

14. (withdrawn) A method for the prevention and/or treatment of hyperlipidemia which comprises administering an effective amount of a composition according to claim 12 or 21 to a mammal.

15. (withdrawn) A method for preventing and/or treating arteriosclerosis which comprises administering an effective amount of a composition according to claim 12 or 21 to a mammal.

AMENDMENT UNDER 37 C.F.R. § 1.116
U.S. Appln. No. 10/019,249

16. (withdrawn) A method for suppressing foaming of a macrophage which comprises administering an effective amount of a composition according to claim 12 or 21 to a mammal.

17. (withdrawn) A method for retracting arterial sclerosis lesions which comprises administering an effective amount of a composition according to claim 12 or 21 to a mammal.

18. (withdrawn) A method for inhibiting formation of arterial sclerosis lesions which comprises administering an effective amount of a composition according to claim 12 or 21 to a mammal.

19. (canceled)

20. (withdrawn) A method for preventing and/or treating of arteriosclerosis, which comprises administering an effective amount of a composition according to claim 12 or 21 to a human.

21. (currently amended) A pharmaceutical composition comprising a compound represented by the following formula (II)

wherein, R¹¹ represents one or more functional groups on the benzene ring selected from the group consisting of a hydrogen atom, a halogen atom, a lower alkyl group, and a lower alkoxy group; R¹² represents a hydrogen atom, or an alkyl group, or an acyl group; R¹³ represents one or more functional groups on the piperidine ring selected from the group consisting of a hydrogen atom, an alkyl group, a hydroxyalkyl group, a phenyl group which may be substituted, a hydroxyl group, an alkoxy group, an amino group, an acyl group, a cyano group, a carbamoyl group and an alkoxycarbonyl group; L¹ represents a C₄-C₈ alkylene group; and X represents O, S, or methylene group, or a physiologically acceptable salt thereof as an active ingredient, and a pharmaceutical additive.
